

# Shillzzz - One Pager

-Shill and Earn-

## ■ The Mission

Let's be real: crypto "influencers" aren't believers anymore. Back in 2021, they rode projects they actually cared about. Today? It's just a straight-up cash grab. They'll shill anything as long as the bag is big enough. Projects still pay them—because they have no choice.

Meanwhile, the real grinders—the community members spending hours on Twitter hyping their favorite coins—get **zero rewards**. That's broken.

**Shillzzz is here to flip the script.**

## ■ How It Works

**List Free** → Any project can list their token for free.

**Click to Shill** → Every valid click through the Shillzzz app counts as a real shill.

**Leaderboards Don't Lie** → The more active your community, the higher your token climbs.

**Get Paid to Shill** → 40% of all platform revenue (ads + booster sales) goes straight to the **top 10 shillers every week**.

This isn't about follower counts. It's about hustle, community, and results.

## ■ Stop Paying Them

Why line influencer pockets for lazy tweets when you can empower your own people? Why pay gatekeepers when you can shill, earn, and win with Shillzzz?
